Buzon Pedestal International Supplier of High Quality Raised Floor Support System

The company Buzon Pedestal International S.A. located in Belgium is a highly specialized company active in the design, development, production and commercialization of a unique system of pedestals used for all types of raised floors, terraces, pedestrian areas, timber decking, etc. in internal and external areas. The Buzon Pedestal system has a proven track record, it is being used in more than 35 countries in the world, and has now an impressive list of international references such as the new Parliament Building of the **European Union** in Brussels, Belgium; the International Finance Center in Hong Kong; the new Center for Research and Treatment of Diabetes in Kuwait; the new Museum of Islamic Art in Doha, Qatar and the new Police Headquarters Building in Dubai, UAE.

The Buzon pedestal system offers the following advantages:

- Heights from 17 mm up to 620 mm can be reached;
- Resistance to UV and various weather conditions (-20 to +120°C); they are highly resistant to chemical products;
- With a top surface of 190 cm² it is possible to hold any type of decking material;
- The spacer tabs (fixed on top of the pedestals) are available in different sizes (2; 4.5; 6 and 10 mm thickness);
- This system can be easily installed on whatever type of substrate. The pedestals are supported by a base of 320 cm²; this enables installation directly on top of insulation panels;
- Slope compensation with the PH5 slope corrector is possible from 0 to 5%;
- Loading capacity is 1000 kg/ pedestal;
- Pedestals are made of 5 mm-thick polypropylene and are therefore particularly strong; and
- Now the pedestals are also available in a transparent version (made of polycarbonate) for holding glass tiles to create illuminated raised floors. ■

تختص شركة Buzon البلجيكية بتصميم وتطوير وإنتاج وتوزيع أجهزة الدعائم لكافة أنواع الاستخدامات الداخلية والخارجية. تملك الشركة سجلاً جيداً إذ أن منتجاتها تستخدم في أكثر من 35 دولة في العالم وقد عملت في العديد من المشاريع الهامة مثل مبنى الإتحاد الأوروبي في بلجيكا.
